

## *Technology Solutions That Work (TSW)*

North Dakota K-12 License Sponsored by EduTech

**New for 2007! TSW has been updated to include Literacy for Grades 6-8**

**What is *Technology Solutions That Work*?** TSW is a database of comprehensive analysis of what research says works and doesn't work with technology in schools. TSW is a resource/tool designed to assist school administrators in making better decisions related to math/reading software purchases. As a society our schools are forced to comply with strict budgetary constraints making it necessary for schools to invest their dollars wisely. TSW is a secure reliable resource administrators can trust to assist in decision making about technology purchases.

**Who Should Use TSW?** All K-12 public and private administrators, technology coordinators, Title teachers and curriculum specialists, and others in your district who make purchasing and implementation decisions on curriculum intervention and reinforcement.

**How can I learn more about TSW?**

*If you are new to TSW*, please contact EduTech to schedule a free training for representatives from your district. The training includes an overview of the TSW database and how to navigate through the resources, along with information you'll need to access TSW in your district.

*If you are familiar with TSW* through last year's state license, you are encouraged to continue referencing the TSW database as you make purchasing decisions on technology to support the reading and math curriculum.

**What is the Cost?** Public school user's license for the school district is at **NO COST**. Private school attendee cost is \$20/participant however, because of the great volume purchased, the cost is much lower than if you had purchased on your own. Training is required to receive license. Training includes train-the-trainer materials for your school and access for trained representatives from your school.

“ Bringing you comprehensive analyses of what the research says works and doesn't work with technology in schools ”

---

**Questions? For more information about using TSW in your district please contact**
