

INSTEP with EduTech

Instructional Technology Partners (**INSTEP**) is designed to support teachers as they move along on the continuum of technology integration.

The **kick-off**, involving the administrator and entire teaching staff, enables teachers to see what resources are available to them in their particular school and provide them with the pedagogy behind technology integration.

Post kick-off, the EduTech partner works with three to five teachers one-on-one. Each teacher designs, modifies and integrates a technology-based activity into some part of their curriculum. Upon request, more than one wave of teachers can be taken through this process for an additional charge.

A **graduate credit** is available, for an additional charge, to the three to five teachers participating.
