

MUSEUM OF SCIENCE AND INDUSTRY

*presents live interactive videoconference*

*January 20, 2010 & April 7, 2010*

*9:00-11:30 am CST*

<http://www.livefromtheheart.org>

Four North Dakota classrooms are invited to participate in Live....from the Heart interactive videoconference, a unique education outreach opportunity for students in grades 8-12.

Live...from the Heart is an open heart surgery that comes direct from the Operating Room at Advocate Christ Medical Center in Chicago into the classrooms of four ND schools.

Students will experience a unique opportunity to explore the human heart and all its wonder. Students will be able to ask the surgical team questions about all things heart-related. Live....from the Heart is also a rare glimpse into the world of health professionals, offering unparalleled career exploration experience.

School participation will be available on a first come/ first served basis and schools are encouraged to register early as spots are guaranteed to fill quickly. **Program fee is \$140/class.** *Fee includes classroom materials.* **To register,** contact EduTech at 1.800.804.8550.

**Special Circumstances:** *At times, special circumstances might arise that would require the presentation of a non-live version of the program. Schools will be expected to pay 50% of the regular program fee for this abridged program.*
